

Precautions taken by our school for parents/carers

Primary education

Your child can safely go back to school if we all do this together:

Pick up and drop off

A maximum of one adult brings the children to school and picks them up again.

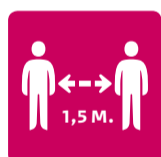

Schoolyard and school

Parents/carers do not enter the schoolyard or the school.

Follow the instructions of the staff

Distance

- Between children: 1.5 m distance not necessary.
- Between teaching staff and child: preventively 1.5 m distance wherever possible (less distance poses no danger, but see what can be done).
- Between adults: always 1.5 m distance.

Pupils and staff stay at home:

- Nose cold, coughing, difficulty breathing/tightness of the chest, sudden loss of smell or taste, or a fever above 38 °C.
- Also stay at home if a family member has a fever above 38 °C and/or an anxiety disorder.
- 24 hours without symptoms = back to school.

Risk groups

Children and educational staff who belong to the at-risk group, or whose family members belong to the at-risk group, can stay at home. Contact the school management and the attending physician about this.

**alleen samen krijgen we
corona onder controle**
